

Product Range Guide

Instant boiling water and
quality catering equipment

About Us

Proudly Australian for over 50 Years

Birko Electrics started life just prior to World War II, making soldering irons for local markets. During the war, a need was identified for some form of portable food and drink heating vessel.

Birko designed and produced the Food and Drink Heater, an electric jug with a concealed element so that the food as well as liquid, could be heated.

After the war, Birko continued manufacturing Food and Drink Heaters, selling them through major department stores. An Electric Kettle was then added to the range of products, followed by a Hot Water Urn for commercial and industrial usage.

Birko expanded further, making industrial elements for washing machines and air conditioners. The element plant developed elements for Birko's domestic appliance market, which further improved the quality and efficiency of its products.

Up to this point, all Birko products had been made from copper and then chrome plated. Copper was replaced by stainless steel in Hot Water Urns for a more reliable, hard wearing and cleaner product which was suitable for commercial applications such as hospitals, factories and Government departments.

Birko's next move was to develop a distribution network throughout Australia, and it soon began to export its products.

A takeover of Westgate Manufacturing in 1988, and Sarena Industries in 1989 allowed expansion of the product range to include Food and Pie Warmers, Gas Urns, and some commercial catering equipment.

Now in the 21st century, Birko is going from strength to strength. It has expanded its product range even further with its TempoTronic and introduced to the market a boiling and chilled water appliance: the Birko TwinTemp. An ideal addition to any domestic or commercial kitchen.

Birko continues to expand and has recently launched a brand new range of commercial catering appliances. It is now proudly represented in New Zealand by Zenith Heaters - part of the Zip Industries group.

Birko Domestic & Commercial Urns

Safe and reliable portable urns.

A size to suit any need. Polished stainless steel body with vented cool to touch, twist to lock lid.

High quality & low maintenance – Chrome plated brass tap at a comfortable cup height and polished stainless steel body with vented, twist-to-lock lid. Welded joints for superior corrosion resistance and effortless cleaning.

Temperature control – thermostat has variable settings, for greater control over the boiling water.

Safety – Push button over temperature cut out turns off the power if the urn boils dry and the non-drip tap prevents accidents and mess.

All you need – indicator light, water level gauge, heat-resistant knobs, easy-lift safety handles and enclosed lockable lid.

Birko Eco Insect Killer

Uses a pheromone impregnated glue board for longer life and increased catch

All metal construction – Robust build quality

Unique swing open front guard and tube assembly - for quick and simple servicing

High efficacy UV tubes - Proven to be more effective and longer lasting than standard UV tubes

Large glue board with integrated “debristray” - large glue board area with horizontal section for insect debris collection

Common tubes and glue boards - Reduced inventory and consumable storage requirements

Wall or ceiling mounting options - Flexible product options

Independent certification - Independently tested and certified to RoHS and all relevant European and Australian standards.

Eco Insect Killer

Part Number	1004104	1004105
Model	White 30 Watt	S/Steel 60 Watt
Coverage	80m ²	160m ²
Tubes	2 x 15W	4 x 15W
Weight	4 Kg	7 Kg
Dimensions (mm)	W 470	W 470
	D 285	D 330
	H 90	H 130

Birko Insect Killer Small & Large

Zap flies and bugs fast for a more hygienic environment.

Attracts and removes a wide variety of flying bugs and insects within a range of 50 to 100 square metres using blue/black fluorescent lights.

Commercial quality – sturdy aluminium construction with a stylish, electrolysis-treated finish and on/off switch

Wide coverage – blue/black light fluorescent tubes attract insects across a range of 50 to 100 square metres

Low maintenance – simply remove and empty the waste tray as needed

Safe – extruded plastic inner with plastic coated safety guards made to CE standards of quality

Practical – chrome plated hanging chain and black ABS fixtures

Elements	2 x 10W (Tube)	2 x 18W (Tube)
Power	35W	50W
Voltage	220-240V	220-240V
Weight	2.9 Kg	4.4 Kg
Dimensions (mm)	W 395	W 645
	D 118	D 118
	H 400	H 400

Birko Filter Cartridges

Genuine Birko replacement filter cartridges.

Attracts and removes a wide variety of flying bugs and insects within a range of 50 to 100 square metres using blue/black fluorescent lights.

New Birko 0.2-micron filters reduce chlorine taste and odour and filter out particles more than one fifth of a micron in size – that's one five-thousandth (1/5000th) of a millimetre – twenty five times finer than earlier 5.0 micron filtration, designed to filter out both Cryptosporidium and Giardia cysts and other impurities, for crystal-clear great-tasting water and healthier drinking.

This is the most advanced and most practical water filtration system available anywhere today, developed to meet our exacting specifications by the world leader in water filter technology.

Birko 0.2-micron filter cartridges are hygienically encased for fast and easy filter cartridge replacements.

New Birko Filtration - 1st September 2012

Model	Description	Products which use this item
1311615	Birko 0.2 micron TwinTemp Filter	- All TwinTemp Models
1311616	Birko 0.2micron 6,435L Filter	- All USC models
1311617	Birko 0.2 micron 11,356L Filter high capacity	- All Commercial on wall boiling water
