KITCHENWARE CATALOGUE 2014

C Chef inox
the professionals choice

Dear Customers,

After searching the world for almost 40 years we are proud to present our latest catalogue featuring the most comprehensive range of kitchenware in Australia.

Here are some of the names from around the world:

-  Paderno (Italy) for high end commercial pots and pans
-  Ivo Cutlerias (Portugal) for professional chef knives
-  Inox Macel (Italy) for gastronorm kitchenware
-  Cookut,  Guery,  De Buyer (France)
-  Thermohausser (Germany)
-  Metaltex and  Ghidini (Italy)
-  Mitchell & Cooper (United Kingdom)
-  Chef Inox (Australia)
-  Valira (Spain)
-  Novacook (China)
-  Unica (Singapore)
-  August Thomsen (USA)

We also have Australian suppliers producing high quality commercial kitchenware. All these products as well as our Chef Inox range from Australia, Europe and Asia are used by leading chefs in restaurants worldwide, and are suitable for professional kitchens or the budding home chef. Our aim is to provide our customers with a complete one-stop shop service.

Chef inox

the professionals choice

ABOUT

Chef Inox kitchenware is developed for the professional arena with the Chef in mind. It is designed to be reliable, durable and easy to maintain, making it a firm favourite with Chefs.

As one of the most established kitchenware brands in Australian hospitality, Chef Inox is an industry pioneer for commercial tools of the trade that assist in the preparation and cooking of food. Encompassing cookware, bakeware, utensils and accessories, Chef Inox has a reputation built on the calibre and breadth of its product range, as well as the solid partnerships and long-standing relationships with suppliers, factories and warehouses, that ensure consistency and quality of product.

As a brand that you can trust, Chef Inox is proudly benchmarked by its product guarantee that cements the usage of the best quality materials, our commitment to research, development and maintenance of environmentally friendly manufacturing practices.

BRAND

Since its foundation in 1989, Chef Inox has consistently built on the foundations of its core range by introducing innovative new products that coincide with new cooking techniques and technologies. Represented by a broad variety of styles and materials, the Chef Inox brands and sub-brands help customers to identify the different features of products by highlighting the benefits and capabilities of each range. Continuing down this path,

2014 has welcomed the introduction of several new ranges and the launch of fresh branding represented by a new logo and colour scheme to compliment the evolution and expansion of the Chef Inox brand.

AT HOME

Chef Inox recognise that people at home want to experience the brands quality and thus our range has been extended, tailored and beautifully packaged for the retail market to deliver products to the needs of 'at home' users. Chef Inox Prep & plate is the latest sub-brand representing high quality Chef Inox utensils that the chef would use in the preparation, cooking and plating of food. Other retail sub-brands include Chef Inox Como utensils, Chef Inox Professional stainless steel cookware and Chef Inox Gravity 2.0 cast aluminium cookware with its unique DuPont™ Teflon® colour coating which reduces abrasion from cooking utensils, guaranteeing a long lasting nonstick surface that won't scratch, stain or chip.

WHAT IS HACCP?

HACCP (Hazard Analysis and Critical Control Points) is an international principle defining the requirements for effective control of food safety. HACCP compliance helps organisations to focus on the hazards that affect food safety and hygiene, and identify them by setting up a management system during the food production process.

ARE YOU FOOD-SAFE?

It is important to recognise that focusing on delivering 'safe food' is only part of the equation and that 'non-food' products used in the food production process also have the ability to contaminate food. Non-food products, materials, equipment and services can have a big impact on the safety of food and on the operation of a food safety program. In Australia there are strict guidelines and laws surrounding the safety of food and authorities are becoming increasingly stringent on regulating non-food products as well. HACCP Australia certifies a selection of servingware and food storage equipment as food-safe and suitable for use in food storage, preparation and serving operations of businesses that operate in accordance with a HACCP based food safety programme. Products are put through a rigorous testing process to achieve HACCP accreditation, so if a product is labeled with its approval, you know it is superior.

HOW WE CAN HELP?

Tomkin demonstrates our commitment to food safety and customer satisfaction by delivering a broad range of products which are HACCP accredited. It is our solution to hygiene & safety in your workplace and we pride ourselves on the quality of this range.

WHAT CLASSIFIES A FOOD-SAFE PRODUCT?

- Well designed with 'food-safe' characteristics
- Non-toxic
- Easy to clean and easy to handle
- Appropriate for use
- Likely to reduce the risk of any form of contamination
- Designed for a low consequence of error in use
- Contributing to food safety in their use

Be aware of what you're buying and to look out for the HACCP logo which indicates that the products being purchased are food-safe.

For more information on the HACCP accreditation program visit www.haccp.com.au

- These traditional french frypans variously referred to as iron frypans, black steel frypans or carbone steel frypans are strong and durable
- Suitable for professional high use kitchens
- Perfect for searing, browning and grilling
- Firmly riveted reinforced handle for extra durability
- Suitable for use on all heat sources including induction
- Efficient heat conductor for even cooking
- Heavy gauge steel with electrochemical coating when combined with oil prevents rust and corrosion
- The more the pan is used the better the performance, the darker it becomes the better it is for natural non stick qualities
- Allows for high heat which seals quickly keeping vitamins and nutrients in food
- 3mm thick gauge

**Steel frypan heavy gauge

- The “LaLyonnaise” is the traditional “granny-style” frying pan.
- The light weight blue steel plate is suitable for low power heat sources
- Recommended frying, braising or browning
- HACCP accredited
- High fluted and curved skirt, no sharp angles, enabling the food to slide from the frying pan to the plate or dish
- Firmly riveted handles for extra durability
- For intensive use in professional kitchens

GRAVITY 2.0

- 100% PFOA free
- 6mm base and 4mm thick wall provides optimal heat distribution and retention to create ideal cooking conditions
- One piece cast aluminium body provides strength and durability
- Scratch resistant which even permits the use of metal utensils
- Cast stainless steel heat resistant riveted handles

- Dupont "teflon select" 4 diamond advanced 3 layer coating system for optimum non stick performance.
- Available in three fashionable colours Mars, Saturn & Venus
- Dishwasher safe
- Oven safe to 200°C

Suitable for electric, gas, induction, ceramic and halogen

The latest French cookware brand, which is becoming a firm favourite with keen cooks around the world. It brings you innovative, stylish and eco-friendly products offering a fresh take on utensils. The ranges draw from France's long tradition and expertise in kitchen accessories, but also look to the future. Cookut means modern technology, intelligent design and bright colours.

- The hi-tech cast aluminium is four times lighter than the standard cast iron
- Non stick inside and out, for easy cleaning
- The ceramic coating manufacturing process using natural mineral materials is far more environmentally friendly (fewer CO² emissions) than standard non-stick coating

Made in France

The DeBuyer universal corer is a patented system for food preparation. De Buyer corer can manually extract the core, hollow out, top and tail and allows for stuffing. High quality design allows for universal use when preparing various fruits and vegetables. The corer is made from a stainless steel blade with tubes marked with 10mm graduations. Incorporated into the design is an anti-slip ergonomic polypropylene handle.

Easy to display stands with electronic POS video screen showing step-by-step user guide

Made in Portugal

- One-piece, hot-dropped fully forged knife, from a single blank
- Commercially durable range suited to high usage environments
- Virtu Black is black throughout the entire body of the knife and will not sharpen to another colour, unlike coated stainless steel.
- Superior cutting performance with antimagnetic stainless steel handle AISI304
- Suitably packaged for retail sale
- Sophisticated design provides superior handling, balance, safety and hygiene
- Designed to resist rust and corrosion for the life of the product
- Made from the finest, high carbon, special alloyed, surgical German stainless steel containing exact proportions of carbon, chromium, molybdenum and vanadium (x55 Cr Mo v14)

- Commercially durable knife range
- Suitable for use in both commercial and domestic kitchens
- Superior cutting performance
- Constructed from the finest quality German Stainless Steel containing exact proportions of carbon, chromium, molybdenum and vanadium (x50 Cr Mo v15)

- Design modelled on the blacksmiths of Fukui region, Japan who have been forging steel for over 800 years
- One-piece, fully forged, full tang knives
- Comfortable, durable and sleek structured handles made from Polyoxymethylene (POM)
- Modern design with with old world European craftsmanship

Coloured handles help identify each knife with a specific task. Reduces the potential for cross contamination of food during the food preparation process. High quality blades manufactured from special stainless steel containing Carbon, Chromium and Molybdenum, ensuring high hardness, long lasting edges with high resistance to corrosion and excellent cutting power. Ergonomic non-slip handles made from polypropylene for safety and hygiene. A functional and economical product.

Coloured boards provide a great tool for controlling crosscontamination in a commercial environment. Colour-coding of cutting boards and other utensils designates specific colours to particular food types which can prevent bacteria from raw foods contaminating cooked foods. It also minimises incidences of food tainting, in which strong flavours, such as fish are transferred to more delicately flavoured foods.

HACCP Australia recommends the following colour codes which are widely accepted in Australian kitchens (above next to the HACCP logo)

Clive Withinshaw of HACCP Australia says "We have evaluated a number of cutting board against our standard and, to date, only Tomkin Australia's Chef Inox Colour Coded Cutting boards have been certified as conforming to the HACCP Australia Standard. They definitely represent the best in terms of hygienic design and materials".

The Chef Inox Colour Coded boards are manufactured using hygienic, tough polypropylene provides an autoclavable product with high chemical, stain and aroma resistance. These cutting boards will not dull knives, chip, splinter nor warp. They are colour coded, dishwasher safe, non-absorbent and have a temperature range of 20°C to 105°C. They represent the high standard that busy commercial food handlers demand - especially those which to meet the exacting standards of modern food safety standards - particularly important for sure products that have frequent food contact.

PORTIONER / ICECREAM SCOOP

The lightweight and efficient handle featured on all Bonzer portioners are guaranteed against breakage. Each model features a central scraper activating spindle and patented integral return mechanism with no springs to break.

- Easily identified by colour coded handles
- Quick release stainless steel bowl and scraper unit
- High quality food grade stainless steel
- Designed and manufactured in the UK
- Reliable exact measurements
- Size signifies scoops per litre
- Dishwasher safe

- The patented R'System® has perforations located between the various imprints of the sheet allowing a reduction in cooking time
- All products are made from foodgrade Platinum silicone without peroxide, allowing for intensive use
- R'System® is economic in its use of the number of cavities on the one baking sheet
- Moul'flex moulds are safe for oven cooking and freezing, -40°C to +300°C
- Made in France

- Bormioli Rocco is the leading supplier of glass storage jars and preserving jars in Italy and many countries around the world
- Fido range is known for traditional preserving i.e, in salt, oil, alcohol and vinegar, all the preserving methods that dont require boiling the jar first.
- Features a unique hermetic sealing system using a rubberseal inside the lid and metal clamps which ensures a completely airtight seal. Perfect for dried goods, pickles and chutneys.
- Glass is the most practical and environmental storage solution

- Designed for home made preserves with industrial processing criteria
- Combines the traditional qualities of preserving in glass with the safety features and guarantees of modern vacuum sealing
- The special feature is the sealing gasket in the lid which allows air/gas to escape while at the same time preventing water form entering during the preserving process.

MATERIAL FACT SHEET

MATERIAL	ABBREVIATION	HEAT RESISTANCE	FEATURES
Acrylonitrile Butadiene Styrene	ABS	approx -30°C up to +95°C	Shockproof, dishwasher-proof
Expanded Polypropylene	EPP	approx -40°C up to +120°C	Lightweight, break-resistant odour and tasteless, dishwasher-proof
High-density-polyethylene	HDPE	approx -40°C up to +95°C	Unbreakable, shock-proof, for a short period of time resistant against boiling water
Melamine	MF	up to approx +95°C	Lightweight, break-resistant odour and tasteless, dishwasher-proof
Low-density-polethylene	LDPE	from -40°C up to approx +100°C	Unbreakable, shock-proof, resistant and dimensional stable against boiling water
Polyamide 6	PA6	up to approx +130°C	Glassfibre-reinforcement possible, hard wearing, unbreakable
Polycarbonate	PC	up to approx +135°C	Very stable and breakable,sterilisation possible, dimensional stability in boiling water
Polyoxymethylene	POM	from - 40°C up to approx 140°C	Dimensional and temperature stability, dishwasher-proof
Polypropylene	PP	up to approx +125°C	Unbreakable, shock-proof resistant and dimensional stable against boiling water, sterilisation possible
Polystyrene	PS	up to approx +75°C	Shock- and scratch-proof for parts under normal stress shock, cut & acid proof
Formica	Formica	up to approx +150°C	Scratch resistance, sterilisation possible, to a certain extent shock, cut & acid proof
Styrene acrylonitrile	SAN	up to approx +95°C	Very hard surface, scratch resistant and shock proof
Low-density-polethylene	LDPE	from -40°C up to approx +100°C	Unbreakable, shock-proof, resistant and dimensional stable against boiling water
Stainless steel (18/10)	S/S	Special high chromium and nickel-alloyed grades resist scaling and retain strength at high temperatures.	The easy cleaning ability of stainless makes it the first choice for strict hygiene conditions.
